

ELIO GERGES

Thursday, Feb 2, 2022

Your house.,

Toronto, ON – Canada.

Dear Mr. Cory Coletta,

Allow me to introduce myself, I am Elio Gerges. When it comes to networking and ISP Networks, I see your esteemed establishment as a leading company in the field. I am a big fan of your services, and the solutions your company is providing have revolutionized the way we use the internet. I am sure that the skillset I gained from my previous internships, and my outgoing, work-oriented personality will add value to your company. Therefore, find this letter as a way to express my interest in obtaining a job as a Full Stack Developer at your esteemed establishment.

Currently, I am pursuing my Web Design and Development program at Humber College. I graduated in May of 2021 with a bachelor's degree in Computing for Business at Saint Joseph University of Beirut (USJ), Institute of Business Management (IGE). The program is a great combination of both the Business world and the technological world. As a senior at university, we have a major course in IT Infrastructure Administration that's where I found my passion for IT and decided I wanted to build my career based on that.

During my studying year, I have undergone 2 internships. I started my career as a Project Manager and pre-sales intern at a company named Netiks International SAL, where I learned the assets of customer relationship management and Microsoft Dynamics 365. As for the second internship, I held a position of Junior DevOps at a company named Element^n where I explored Docker and the true depth of the IT world. In both internships, I strengthened my ability to work with other people and lead teams, while holding responsibility and respecting deadlines.

At university, I worked very hard on my academic achievements by maintaining an overall GPA of 3.3. Besides the experience and knowledge gained from my internships, I was pleased to be taught by Lebanon's finest professors programming languages like VB.Net, JavaScript, SQL, Java, ASP.Net... Not to forget skills like Management, User Experience and Digital Customer Strategies. I am also very good when working with design patterns. My ability to communicate professionally in English, Arabic, and French will also add value to your company.

Other than the academic achievements I have collected during university, I am proud to say that I participated in many workshops to improve my leadership, presentation, and communication skills. In addition to taking part and creating a start-up called LIKALO that competed in Hult Prize Lebanon; and USJ Entrepreneurship Award where we won first prize. I, also, participated in a

program called University Innovation Fellows designed by Stanford University where I underwent a 6 weeks training program and was going to assist to a Design Thinking workshop in the USA at Stanford d.school (the trip was fully covered by USJ but was cancelled due to the pandemic). My friend and I created a community at USJ called UChange Community, a community for young student changemakers that helps students become agencies of change using innovation and design thinking to help their peer students. All that while maintaining high grades.

Looking forward to hearing from and e-meeting you. I remain at your disposal from Monday till Friday, from 9:00 AM till 6 PM.

With gratitude,

Elio Gerger
